A wide-angle, aerial photograph of a port at sunset. The sky is filled with vibrant orange, yellow, and blue clouds. Several large ships are docked at the port, with industrial buildings, silos, and storage tanks visible along the waterfront. The water reflects the warm colors of the sunset.

Clean Air Plan strategies are designed to support and accelerate the new State regulation.

- Grant funds for cleaner tugs
- Shore power
- Slow-speed zones
- Phase out older tugs

ZE Cargo Handling Fleet

Port of Stockton
CALIFORNIA

Technology demonstrations with our operators have been critical in identifying issues, promoting solutions, and accelerating zero-emission equipment deployments across the nation.

- 54 light, medium, and heavy-duty electric forklifts (30 for Port, 24 for SSA)
- 2 electric mobile harbor cranes (Port)
- 6 electric terminal tractors (SSA)
- 54 direct current fast chargers (DCFC) to serve the Port's and SSA's electric cargo handling equipment (CHE) (Port, SSA)
- 6 MW of rooftop solar power directly powering the Port's and SSA's electric CHE (Port)
- 1.5 MWh of battery energy storage directly supporting the Port's and SSA's electric CHE (Port)
- 1 electric mobile railcar indexer to replace up to 5 diesel locomotives (Stockton Soda)
- 1 shore power system to provide power to Marathon's ocean-going tanker vessels while at berth in its Martinez, CA Renewable Fuels Refinery (Marathon)
